PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Computer Engineering graduate with hands-on experience in full-stack web development using the MERN stack and Python. Skilled in building responsive web applications, developing RESTful APIs, working with databases, and deploying cloud-based solutions using Docker and AWS S3. Strong problem-solving and communication skills with a keen eye for clean, maintainable code. Passionate about creating meaningful digital experiences and exploring the potential of Machine Learning and Artificial Intelligence in modern applications. Always eager to grow, adapt, and contribute in fast-paced tech environments.

TECHNICAL SKILLS

- ◆ Programming Languages: Java, JavaScript, Python
- ◆ Backend Development: Node.js
- ◆ Frontend & Web Development: React.js, HTML, CSS, Bootstrap
- ◆ Databases : MongoDB , SQL
- ◆ Cloud (AWS): AWS S3 , EC2 Instance , Load Balancers, AWS Lambda, AWS VPC
- ◆ ML & Tools: Scikit-learn, Pandas, NumPy, TensorFlow, Seaborn, Matplotlib
- ◆ Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Clear Communication

PROJECTS

E-commerce Website - MERN Stack

- ◆ Technologies: React.js, Node.js, Express.js, MongoDB, AWS S3
- Built a full-stack e-commerce site using React for frontend, Node js for backend, and used MongoDB to store data.
- Uploaded and stored product images using AWS S3
- Used MongoDB to store all app data Built a clean and mobile-friendly shopping interface

Decentralized Social Media Platform

- ◆ Technologies: HTML, CSS, JavaScript, Remix, Smart Contracts, Seoplia (Gas Fee)
- Developed a decentralized social media platform where users can create profiles, post content, like, comment, and interact with others securely using blockchain technology.
- Created and deployed smart contracts on Ethereum using Remix IDE for content ownership, transactions.
- Integrated Seoplia for affordable gas fees, ensuring seamless and low-cost blockchain transactions for users.
- Stored content on IPFS for decentralized, secure, and scalable storage, while building a responsive frontend with HTML, CSS, and JavaScript.

Hospital Management System

- ◆ Technologies: HTML, CSS, JavaScript, Python, Machine Learning, AWS EC2
- Built a Hospital Management System featuring an online medical store, a symptom-based disease predictor using ML, and a chatbot for basic medication guidance.
- Developed the frontend with HTML, CSS, and JavaScript, while the backend was implemented in Python, integrating ML models for prediction.
- Designed a user-friendly and responsive interface, ensuring smooth patient interaction and handling of medical data.

EDUCATION

Bachelor of Engineering (B.E) - Computer Engineering

- ◆ Vishwaniketan's Institute of Management Entrepreneurship and Engineering Technology
- 2021 – 2025 | CGPA: 7.35

Higher Secondary (HSC) - Science

- ◆ J.M. Rathi English School and Junior College
- 2020 – 2021 | Percentage: 90%

Secondary School Certificate (SSC)

- ◆ J.M. Rathi English School and Junior College
- 2018 – 2019 | Percentage: 92%

ADDITIONAL INFORMATION

- ◆ Hobbies- Trekking, Reading
- ◆ Certifications- Java Full Stack Development (JSpiders)
